

# SpyGlass

- A measurement device designed to
  - Detect float, low E, lamination
  - Measure thickness of glass, spacer, IG unit (or single pane), convexity/concavity of IG unit (over/underpressure)
- Features
  - Big screen, all the measurement data readable at once
  - Easy to use, simple user interface
  - Battery operated, rechargeable!!
- Operating modes
  - Basic measurement (detection and thickness´)
  - Graphical demonstration of the structure of unit being measured
  - Sweep-O-Matic (convexity / concavity of unit)
  - Single glass measurement and low E detection
- Designed by Sparklike
  - Patent pending technology (Measurement of glass derivatives with polarised light)

# Specifications

- Dimensions: 161\*82\*40 mm
- Weight: 230 g
- Operating temperature: -5 - +40 C
- Humidity: 0-90% (Non condensing)
- Power supply: 3.2 V LiFePO battery, 1,3 Ah, fixed
- Charging: MicroUSB connector, charger included
- Operating time 13h measuring
- Display: 160\*160 pixel graphical lcd
- Measurement time: 0,5 sec
- Class 1 laser product

# SpyGlass pricing

- Price: 895€
  - - the SpyGlass prices include the device itself, and accessories (charger+socket adapter to your country, instructions manual, USB cable and carry strap)
  - - Shipping costs will be added to the invoice
- Payment terms:
  - advance (50% at launching the order, 50% at loading date confirmed by us)
- Potential target groups
  - IG manufacturers, Glazing and installation companies, window and door manufacturers, building inspectors, building contractors others?
- Expected delivery time
  - 3 weeks
